Four repositionable lenses minimize blind spots and allows the camera to adjust to the various shaped intersections and monitoring areas found in cities.

i-PRO EXTREME

Multi-Sensor Camera 4 x 4K(33MP)

WV-X8570N

Multi-Sensor Camera 4 x FHD(8MP)

WV-S8530N

4 x True 4K high resolution

- Can identify vehicles 100 feet diagonal from intersection corners at three lane streets (WV-X8570N)

WV-X8570N

WV-X8570N : with Base Bracket

Combining H.265 compression with Smart Coding technology

- In spite of the high resolution of 4 x 4 K, it achieved the bit rate lower than the bit rate of one 4K camera of H.264.

* "H.265 with Smart Coding" provides max.95% reduction in total file size when compared to "H.264 without Smart Coding" but it depends on a scene.

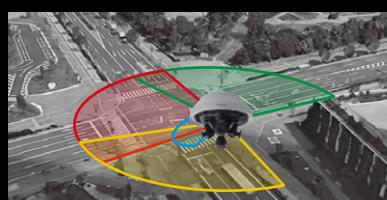

Wide range tilt angle adjustment mechanism

Four repositionable lenses enables to monitoring at minimize blind spots

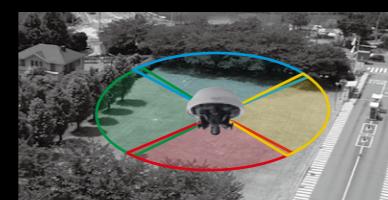

● 270-degree view (Full intersection view)

- One multi sensor camera at intersection corner, It enables monitoring with minimized blind spots
- Enables to monitoring even if bottom view angle

● 360-degree view

- One multi-sensor camera enables monitor the park by minimize blind spots

Recognizes those who don't want to be recognized

Our world leading* deep learning facial recognition technology triggers even when the subject is wearing sunglasses.

i-PRO EXTREME

Facial Recognition Server Software

WV-ASF950

Additional Camera Kit

1ch : WV-ASFE901

4ch : WV-ASFE904

Registration Face Extension Kit

10,000 face : WV-ASFE951

Extension software

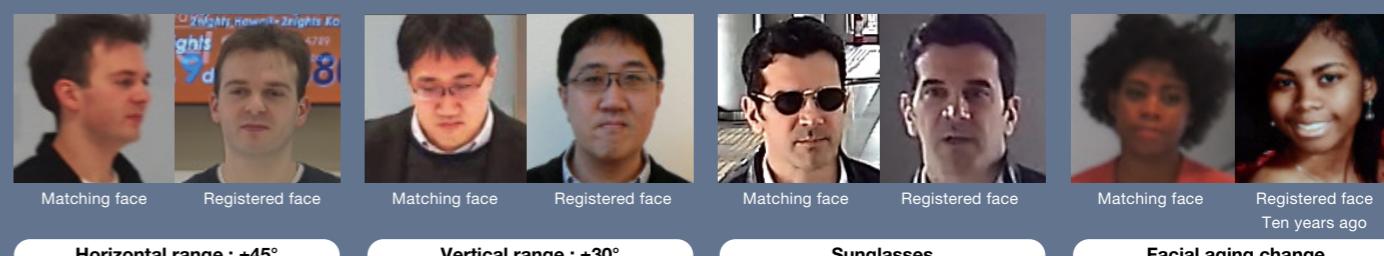

WV-ASE231 for WV-ASM970/WV-ASM300

Facial recognition server software using deep learning technology

High performance facial recognition

- High performance Deep Learning facial recognition function distinguishes face orientation, sunglasses, facial aging change

Face search and face matching functions

- Face matching speed is very fast. Its speed is only 1 second(*1) with 30,000 faces.
- This system can register max.30,000(*2) faces for face matching.
- The face search function of this system can search 5 million faces of database in 3 seconds(*3).

*1 From receiving the face thumbnail to matching in face matching server.

*2 Two Additional Face Registration Kits WV-ASFE951 are necessary.

*3 The best case when the time range is narrowed down and the number of search result is 100 faces.

Depending on the search conditions, the search time may take several minutes.

Industry examples

Airport

Railroad

Stadium

Retail

Hospitality

* In April 2017, the product achieved the highest level of face recognition performance in the world in a comparison test (IJB-A Face Verification Challenge Performance Report/IJB - A Face Identification Challenge Performance Report) of NIST (National Institute of Standards and Technology) of the United States, one of the most authoritative institutes in the world.

Delivering sharper images with higher sensitivity.

Featuring a more intelligent solution.

Introducing the 360-degree Network Camera!

i-PRO
EXTREME

360-degree Vandal Resistant Outdoor Dome
9 Megapixel Network Camera

WV-X4571L / WV-X4571LM

360-degree Indoor Dome
9 Megapixel Network Camera

WV-X4171 / WV-X4170

● High-quality images allow evidence to be captured even under challenging conditions

- Stereographic projection lens provides low distortion images.
- Dynamic and sharp images capture objects even in varied lighting conditions.
- Auto back focus captures clear images by adjusting focal length automatically.
- IR-LED provides clear black and white images even in dark environments of 0 lux.
- These cameras meet railway standard EN50155, water resistance standard IP66, and impact resistance standard IK10.

● Extreme H.265 video compression with new Smart Coding

- H.265 video compression reduces the amount of data while still maintaining video quality.
- Smart Coding reduces the amount of data according to the motion of the video.

● Complete with powerful intelligent functions

- These cameras have Intelligent Video Motion Detection (VMD) functionality and other various Intelligent functions can be added by installing extension software WV-SAE200.

New Aerodynamic PTZ with EXTREME PERFORMANCE - under - EXTREME CONDITIONS

AeroPTZ

Suitable for mission critical tough operations under arctic-to-desert weather, salty gust winds, and heavy vibrations

- Hybrid image stabilizer
- Wind Resistant
- Operation : 216 km/h (135 mph)*
- * Upright position
- Non-destructive : 288 km/h (180 mph)
- Salt Air Resistance (ISO 14993 compliant)
- Waterproof IP66 & IP67 Standard
- Vandal Resistant (Meets IK10 Standards)

With optional IR LED Unit

Anti-severe weather PTZ network camera

WV-SUD638
(Natural silver)

-H(Gray)

-T(Brown)

IR LED Unit

WV-SUD6FRL1(Natural silver)
WV-SUD6FRL-H(Gray), **-T**(Brown)

Wiper & Washer

The Wiper & Washer removes water and dirt that may blur images.
Always monitor crisp and clear images.

Easily Adjust the Direction of the Camera

Use the 360°endless pan and tilt functions to easily adjust the direction of the lens, automatically survey a preset area, or combine the camera with an external sensor to automatically adjust the direction of the lens towards a detected abnormality. Even monitor directly under the camera.

(Front Tilt 45° to Monitor Directly Under the Camera)

Capture High-Resolution, Smooth & Natural Images

FULL HD
Full High Definition
1080/60p

Ultra-high 4K picture quality for detailed, wide-area monitoring with a single camera.

4K
ULTRA HD

Fewer cameras also means a substantially lower total cost of ownership.

4K Vandal Resistant
Weatherproof Dome Network Camera

WV-SFV781L

4K Vandal Resistant
Weatherproof Network Camera

WV-SPV781L

Ultra high-definition, 4K picture quality

Ultra HD 4K cameras offer 27 times the resolution of conventional analog cameras (VGA), nine times that of standard HD (1,280 x 720) and four times that of Full HD (1,920 x 1,080).

This means that the finer details of images remain clear even when you need to magnify only a part of the image.

The high performance lens used by Panasonic's 4K cameras provides uniformly high-resolution images from the center out to the edges.

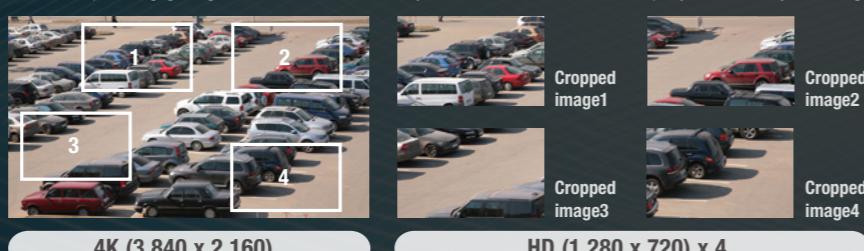

Cropping Function

A given area within a single image can be selected, cropped and displayed.

For example, areas with high monitoring priority, such as a parking garage entrance or a hallway, can be selected and displayed for easy viewing. You can still keep an eye on the overall image while also focusing on specific areas.

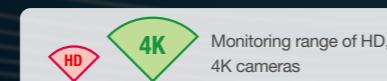

With PTZ cameras, when the lens is pointed in a single direction, other areas go out of view during that time, but with a 4K camera you can monitor the entire area while also watching specific areas requiring more focused monitoring.

Wide-Area Monitoring

A single 4K camera can effectively monitor a wider area, which allows you to reduce the total number of cameras while also eliminating blind spots. Monitoring can be performed not only at vertical and horizontal angles, but for deeper depths as well. And, even when monitoring within the same area, 4K's increased range means that the number of units required is reduced substantially compared to that of conventional cameras. This translates into reduced costs for the cameras themselves, less installation time and labor, and lower maintenance costs.

4K-ready monitors can also reduce the number of monitors needed in the control room.

Low Light Ready

The camera's ultra-high 4K resolution allows it to capture color images in dim, low-light conditions.

In even darker conditions, the camera can use its monochrome inversion function to switch to black-and-white images, and in zero-light conditions it can accurately display what is happening in front of it using infrared LED vision.

Light near subject : 1 lux

High-power 6x zoom lens with an ultra-wide angle of 100°

An optical 6x zoom lens comes standard.

The viewing angle range and zoom power can be set in line with conditions where the camera is installed. Using a proprietary 3-drive lens system,

Panasonic has developed a high-power 6x zoom lens with an ultra-wide viewing angle of 100°, a type of lens that is extremely difficult to produce using conventional optical design methods.

The lens is capable of capturing an extremely wide area, allowing effective 4K coverage of outdoor areas.

- Ultra-wide-angle 100° : Wide-angle monitoring of parking lots, stadiums etc. utilizing 4K resolution
- Telephoto 17° : Monitoring of individuals or crowds from a distance.

This is the Panasonic difference!

Panasonic's "True 4K Technology"

Panasonic's Proprietary 3-Drive Lens System

The i-PRO TRUE 4K NW Camera is equipped with Panasonic's proprietary 3-drive lens system, which simultaneously drives two zoom lenses and one focus lens. Having three lenses all driven independently allows them to be smaller and their drive areas reduced, and has thus enabled us to make the camera compact enough to fit in a standard camera body while providing a high-power 6x zoom with high 4K picture quality viewed from an ultra-wide-angle of 100°.

Refined Resolution and Superior Contrast for a Higher Level of Video Imaging

In order to create a sharp, clear texture, 12 lenses in four groups are used to provide the ultra-high resolution expected of 4K in every part of the image, from center to edge. Both a higher level of representational precision and a more compact lens system are achieved. Plus, all lenses are glass, while aspheric lenses are also used extensively to reduce aberrations to the ultimate degree. The clear depiction, sharp resolution and beautiful color reproduction necessary for true 4K monitoring have all been successfully achieved.

Easy Installation

Various design features have been added to shorten installation times.

The camera has also been designed to be capable of pointing in the preferred direction at the preferred location.

Dome Type WV-SFV781L

When attached to the mounting plate, the camera's direction can be easily changed at intervals of 90°.

Rotating the viewing area around the lens further allows the lens to be pointed in the desired direction.

The combination of a 6x optical zoom and autofocus also shortens the amount of time required for fine tuning the installation.

Box Type WV-SPV781L

A total of three adjustment points on the camera base and arms enables its position to be fine tuned to allow accurate pointing.

EXTREME Visibility

Enables automatic capture of evidence at the highest quality under dynamic and challenging surveillance environments.

Intelligent Auto Mode (iA)

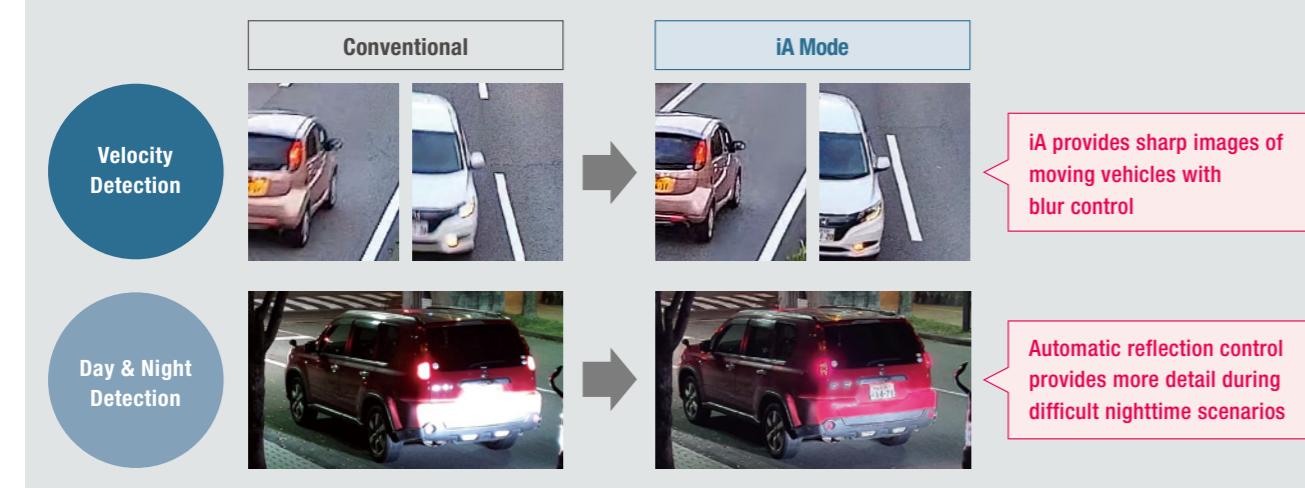

Advanced image stabilization is used to prevent capturing blurry images, and intelligent sensitivity automatically is used to adjust the camera's gain and shutter speed according to brightness levels and movement of the object.

Auto Scene Detection

Parameter Settings

Applications: City safety, traffic, transportation

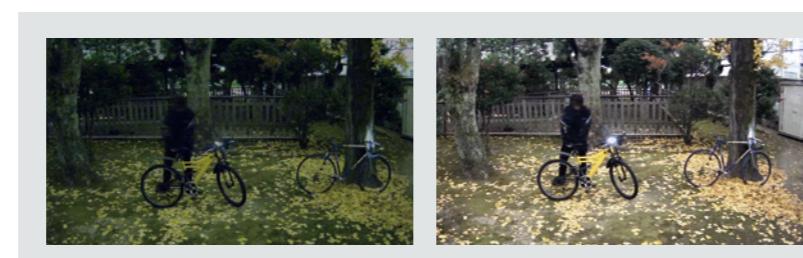

Color Night Vision

Color Night Vision technology transforms a standard 1/3 inch sensor camera into an effective, low-light capable camera, enabling it to produce an extremely high-quality image even in the most challenging lighting conditions.

Applications: City safety, ports, perimeter security

0 lux Pitch Dark Locations

Cameras with a IR LED can be used to monitor environments that are completely dark. This enables areas without the level of illumination required to be monitored to prevent graffiti, illegal dumping, and property destruction.

IR LED can illuminate a wide area so that monitoring is not limited to a specific part of the image.

The built-in IR LED of the outdoor model can capture subjects up to 40 meters away.

Light levels are automatically adjusted for blown out highlights and screen whitening when the IR LED shines on a subject close-by, making the right areas highly visible.

The IR LED is covered to make it difficult to detect from the outside or to know which way the lens is pointing.

EXTREME Visibility

144dB EXTREME Super Dynamic

Combined with the new 144dB enhanced SD capabilities, this high-performance face detection technology can clearly and automatically identify an individual's face.

It offers optimal facial recognition and can capture evidence even in dynamic scenes or heavily backlit conditions.

Applications: Entrances of shopping malls and buildings

Intelligent Zoom Stabilization

High-power, 40x optical zoom lens allows for higher resolution images of objects at a distance.

The advanced image stabilization function can stabilize high-power zoom images by absorbing vibrations.

Visibility Enhancement Technology (OP Software)

i-PRO Management Software is not only used for removing fog but also snow, rain, and other natural conditions that can harm video quality. Besides real-time image processing during monitoring, post-processing is also possible after the images are saved to the recorder.

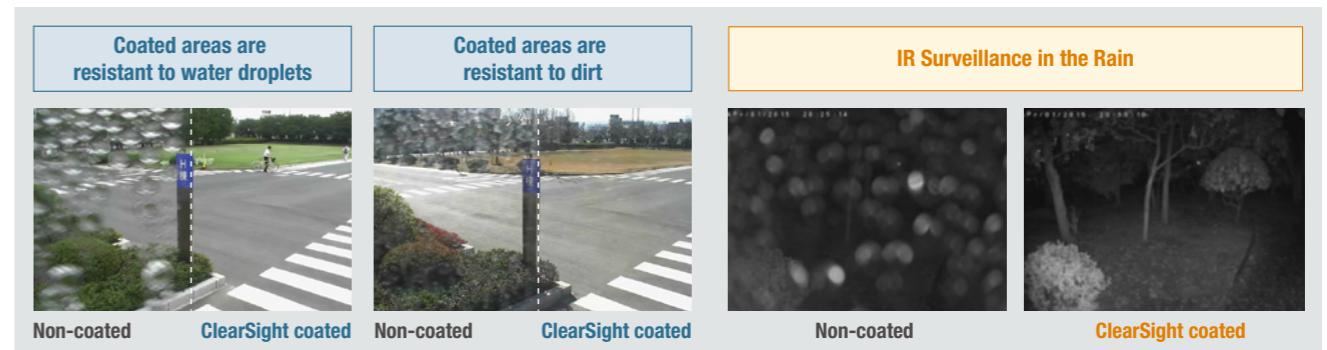

ClearSight coating

Water drops stick to the dome cover on conventional cameras and hinder the shooting of clear images. Our ClearSight coating models are coated to repel water drops in order that the camera captures clear images when it is raining.

This coating is also effective at repelling dirt, which reduces the frequency of needing to clean the dome cover.

The hydrophilic coating can also be touched without special equipment and improves the ease of maintaining the equipment.

EXTREME Visibility

PTZ (Pan-Tilt-Zoom) cameras and omnidirectional cameras enable wide-area monitoring. Multiple cameras can be combined for more efficient monitoring and to eliminate blind spots.

PTZ Camera for Wide Range Monitoring and a High Zoom Ratio

Normal fixed lens cameras can only monitor in a certain direction, but the lens of a PTZ camera can be operated remotely to switch to the direction you want to view. Detailed areas can also be zoomed in to a maximum of 40x. Since the cameras can be infinitely rotated 360 degrees at a high speed of 300 degrees/sec, you will not miss the subjects you want to monitor.

Advanced Auto Tracking

The pan, tilt, and zoom functions can be combined for automatically tracking the movement of a subject.

If the tracked subject moves out of the camera's shootable range, notification is sent to other cameras so that the tracking process can be carried on without interruption.

360-degree Monitoring

The 360-degree Network Camera can capture images around the camera lens in all directions.

Available modes include Fisheye, Double Panorama, Panorama, Quad PTZ, and 4 Stream, and the camera can output video images based on the selected video mode for reduced loads on the viewing system.

De-warping

The 360-degree Network Camera can generate and output video images for each mode within the camera unit.

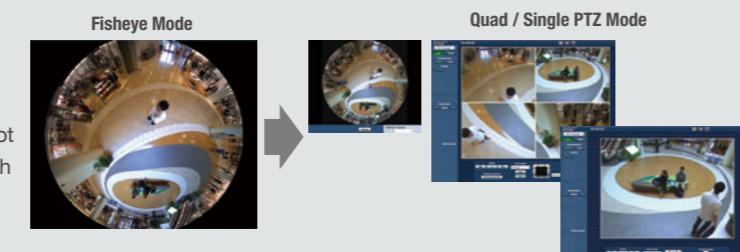

Also, the Network Disk Recorder (WJ-NX400/WJ-NX300/WJ-NX200/WJ-NV300) or i-PRO Management Software (WV-ASM300) can be used on 360° omnidirectional images captured by Fisheye Mode to convert to a format that is easier to view, such as Quad PTZ.

Because the 360° omnidirectional video image is stored in the recorder, nothing is missed within the viewing area.

In addition, the area that you want to view can be selected using a controller or mouse to allow you to automatically move the viewing spot for patrolling the area.

Even during patrolling, areas not visible on the screen are all stored in the recorder in Fisheye Mode so that nothing is left unseen.

The Pan-Tilt of the 360-degree Network Camera does not use mechanical components, and so provides a smooth movement without the mechanized wear that could adversely affect camera longevity.

EXTREME Compression

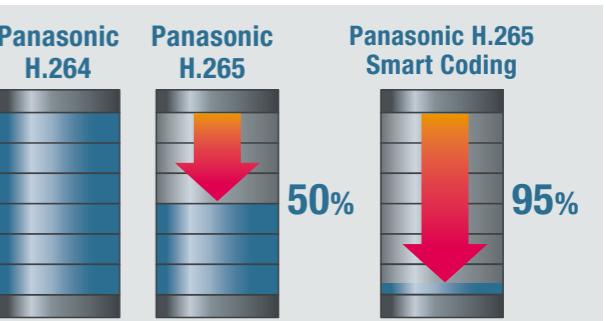

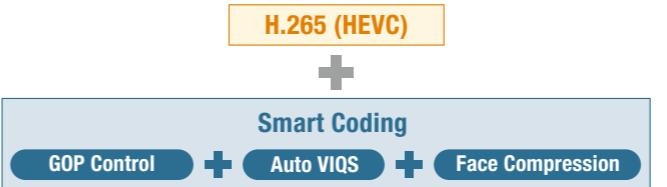

Compression of high-resolution image data is used to reduce network bandwidth, data storage, and server load costs, while maintaining high quality.

H.265 Compression + Smart Coding Technology

Combining H.265 Compression with Panasonic Smart Coding Technology reduces bandwidth by maximum 95%* of conventional H.264 Compression. This security system maintains the quality of moving images while reducing bandwidth and storage costs.

*Value in Advanced mode with Smart Facial Coding. It depends on the scene.

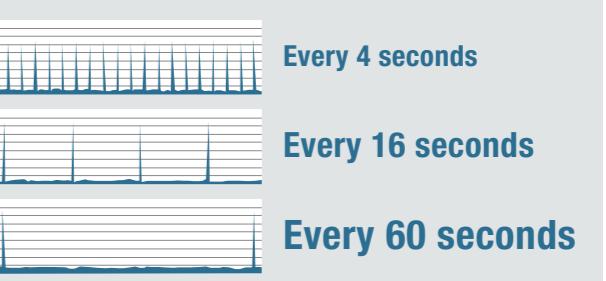

"Smart Coding" provides over 95% reduction in total file size when compared to "H.264"

GOP Control

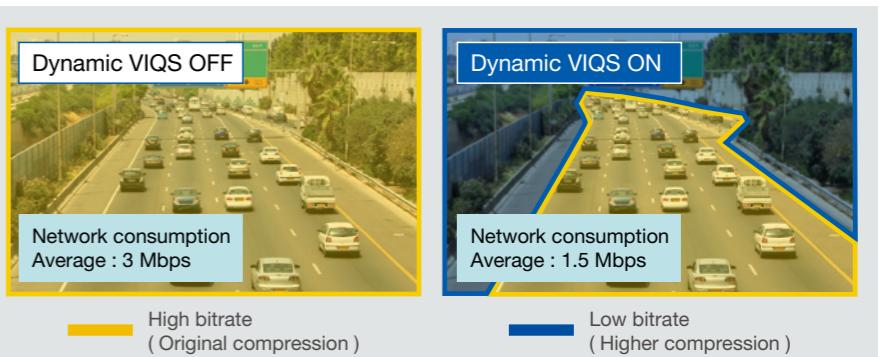

The GOP (group of pictures) control can reduce the total transmitted data of images with little motion by controlling the transmission interval of I-Frame, which is heavy in data.

If the motion is significantly low, the transmission interval can be set to 60 seconds to drastically reduce the total data transmitted.

Auto VIQS

Auto VIQS detects movement within the image and compresses areas with little motion to reduce transmitted data while maintaining the quality of the image.

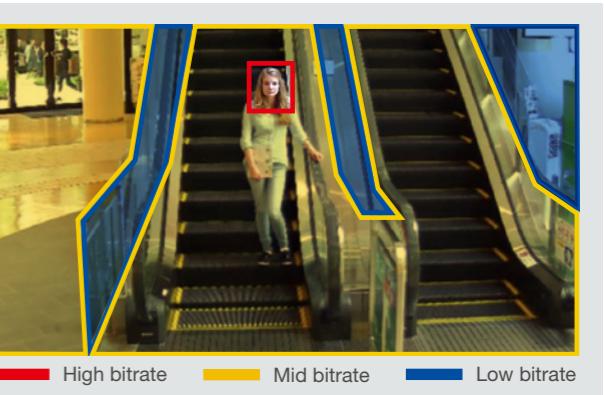

High bitrate (Original compression)
Low bitrate (Higher compression)

Face Compression

The camera automatically distinguishes the sections of the images that are important such as moving objects and people's faces.

The quality of unimportant areas is reduced without compromising the quality of important sections, therefore optimizing the data size of the footage.

On top of integrating Smart Coding into the conventional GOP Controls, the improved compression efficiency through Auto VIQS and Long-Term Compression combined with Smart Facial Coding, which detects faces and maintains the quality of only faces, can compress the file drastically to reduce the data size.

High bitrate
Mid bitrate
Low bitrate

EXTREME Data Security

In addition to Data encryption and communication encryption, provide secure network access between trusted devices through device certification then prepare for the threat of advanced cyber attacks.

End-to-End Data Protection Solution

End-to-End Secured System

End-to-End Data Encryption

- Support encryption communication
- Camera-encrypted recording at the edge

Pre-installed Symantec Device Certification

- Communication encryption
- Video tampering detection

FIPS140-2 Level 1 CAVP* compliant

- (Federal Information Processing Standardization)
- For federal/public safety usage

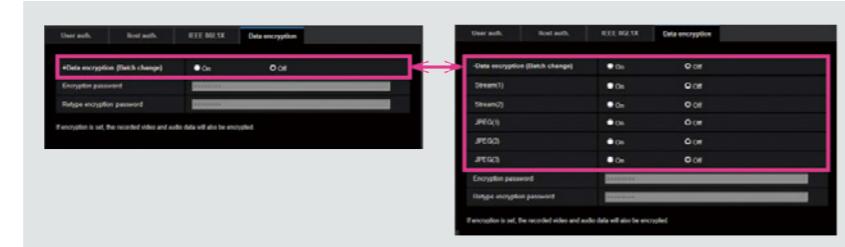

*Evaluated by WV-TW370P

Data encryption

The data encryption function encrypts data to prevent information leakage due to unauthorized access to the camera and theft of the SD card.

If you confirm streams with data encryption set to "On" on the "Live" page, password entry for decryption is displayed. If you correctly enter the "Encryption password" that was set, you will be able to view images.

SD Memory Card Recording

Without using a network, footage can be saved directly to the camera by inserting a SD memory card (SD, SDHC, or SDXC) in the camera.

Settings can be adjusted to only record images to the SD memory card when the alarm is triggered.

Inserting SD memory cards also works as a backup system when there is an issue with the network.

Images will be saved onto the memory cards while the network is down and will be transmitted to the recorder when the network reconnects.

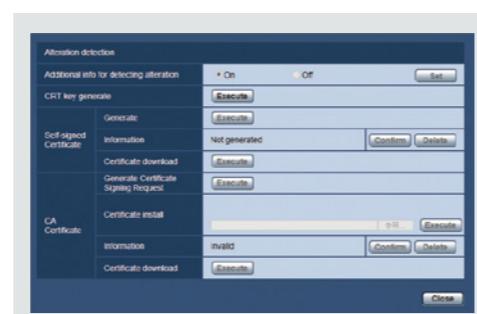

Detect Alterations to the SD Memory Card

Turn on the Alteration Detection and record images to the SD memory card to be able to verify whether or not the recorded images have been altered.

Playback the images recorded onto the SD memory card with a computer and utilize the Integrity Verifier Tool to analyze the raw data and confirm that the recorded images have not been altered.

Download the Integrity Verifier Tool for free from our "Useful Tool" download page.
<https://security.panasonic.com/download/tools/#iv>

EXTREME Reliability

Achieves high endurance and long life in storing information even under harsh environments.

HDD Dynamic Power Control

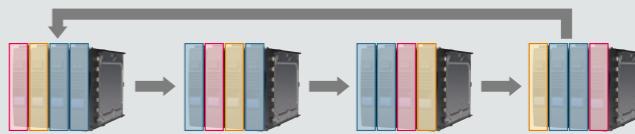

Long life and high reliability is achieved through technology that individually controls access to the HDD. If a recorder needs to recover crashed data, it can do so in a short amount of time.

Individually-managed HDD

WJ-NX400 manages the status of each HDD, using the following three states:

- 1 Active state:** Currently being accessed by the WJ-NX400.
- 2 Idle state:** Ready to be accessed
- 3 Stand-by state:** Halted motor

	Active	Idle	Stand-by
Active	: Motor – On; Head – Read/Write		
Idle		: Motor – On; Head – Home Position (ready for next access to a HDD)	
Stand-by			: Motor – Off; Head – Home Position

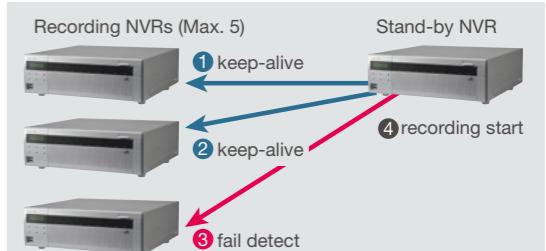

Auto Failover Recording

NVR has an Auto Failover Recording function to reduce the loss of recorded data due to NVR failure.

In the case of an NVR failure, the stand-by NVR will begin recording automatically.

The standby NVR will record instead of the failed NVR, without the need for management software.

High Performance and Flexibility with TURBO-RAID

WJ-NX400 RAID is a specialized hardware RAID (TURBO-RAID).

WJ-NX400 RAID, equipped with TURBO-RAID, maintains the throughput performance of a non RAID configuration. TURBO-RAID can provide guaranteed reliability of data and high-performance throughput.

The recorder can recover data quickly in the event of a crash.

*To use TURBO-RAID with WJ-NX300, Additional RAID Kit is required.

Heavy Salt Damage Resistance, Compliant with ISO14993

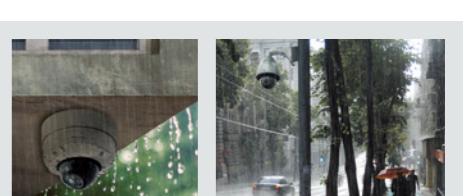

Heavy salt damage resistance, with film thickness of 100 micrometers or more, provides protection from salty wind corrosion.

The use of screws with an anti-salt surface treatment prevents trouble occurring from corroded screws in the product.

Rainwater Protection

IP66 standard The outdoor models have waterproof and dustproof structures that are rated IP66 for exterior installations, eliminating the need for special housing and/or waterproof protection.

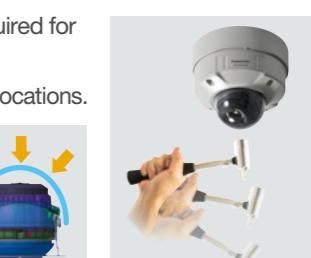

Vandal Resistant

Vandal Resistant When installed in locations that are prone to vandalism and tampering, measures are required for preventing damage to the camera.

Models featuring the Vandal Resistant mechanism are ideal for installation in these types of locations.

Vandal resistant mechanism

Models featuring the Vandal Resistant mechanism include a shock absorber around the internal lens. Even if the dome cover is subjected to a potentially damaging impact, the shock absorber will absorb this impact to protect the internal structure from damage.

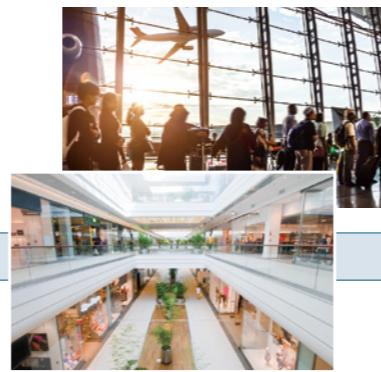

EXTREME Analytics

Identifies and acquires important information, improves accuracy and efficiency of the entire system, reduces system load, and lowers costs and hurdles. Anyone can take advantage of Analytics.

Facial Recognition System

When the camera detects a face, it sends only the facial image data to the server. This greatly reduces the load on the system's main server and enables one system to accommodate up to 20 cameras. The accommodation of so many cameras makes it possible to have multiple-camera coverage extending across a wide area, thereby enabling people-flow paths to be determined and easily tracked in real time.

Face search and face matching functions

The Facial Recognition System takes the camera-captured facial images and compares them with registered faces, sounding a real-time alarm and displaying comparison results on a screen when a match is found.

By using the comparison results to do a facial-image search, it is possible to display the results from each camera as a time series to identify and track a person's movement.

In addition, it is possible to filter recorded images using camera name and date/time, and then determine a subject person's movement by using the alarm history list to replay recorded images linked to an alarm.

System expandability - Integrated into video surveillance system

Vehicle Incident Detection

The Vehicle Incident Detection function detects incidents such as wrong-way driving and stopped vehicles, and then alerts the Traffic Management System.

While it is difficult for a single human operator to physically detect vehicle accidents on multiple camera monitors, such monitoring is made possible with the Vehicle Incident Detection system.

*Extension software WV-XAE100W is required.

Intelligent VMD

Video motion detection

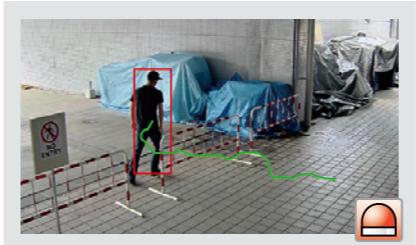

The camera itself features intelligent functionality for notifying the administrator about changes to situations or dangers using a variety of methods. This eliminates the need to constantly watch the screen in the control room for reducing the TCO.

*Extension software WV-SAE200 is required.

Intruder

Type1 / Type2 / Type3 / Type4 / Type5

It is possible to issue an alarm when a moving object enters the area. Up to 8 objects, or 32 objects (Type3 / Type5 only) can be detected simultaneously per channel.

Loitering

Type1 / Type2 / Type3 / Type4 / Type5

It is possible to issue an alarm when a moving object enters the area and stays for the specified period. Up to 8 objects, or 32 objects (Type3 / Type5 only) can be detected simultaneously per channel.

Direction

Type1 / Type2 / Type4

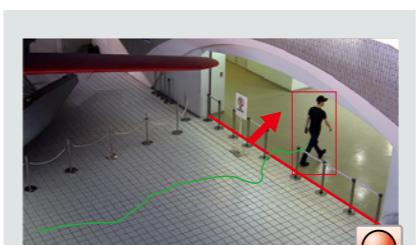

It is possible to issue an alarm when a moving object enters the area and moves to the specified direction. Up to 8 objects, or 32 objects can be detected simultaneously per channel.

Cross line

Type2 / Type3 / Type4 / Type5

It is possible to issue an alarm when an object moving to the specified direction crossed the line. Up to 8 objects, or 32 objects (Type3 / Type5 only) can be detected simultaneously per channel.

Object

Type2 / Type3 / Type4 / Type5

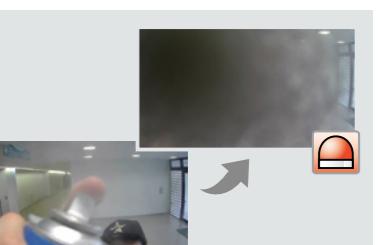

It is possible to issue an alarm if an object (suspicious object, etc.) is left behind in the area or taken away from the area. Up to 8 objects, or 24 objects (Type3 / Type5 only) can be detected simultaneously per channel.

Scene change

Type1 / Type2 / Type3 / Type4 / Type5

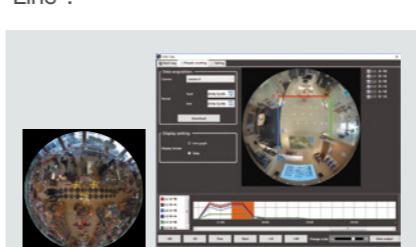

It is possible to issue an alarm when a camera is covered with something or the camera direction is changed to shoot a different subject.

People Counting

Type3 / Type5

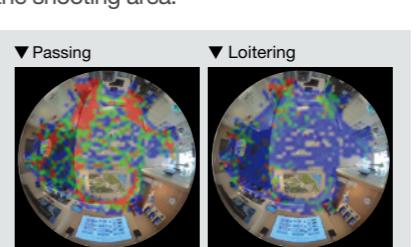

It provides function of counting the number of people who crossed the line in a certain direction which is set with "Line".

Heat-map

Type3 / Type5

Heat-map provides statistical information of traffic lines. Counts up both passing and loitering in the shooting area.

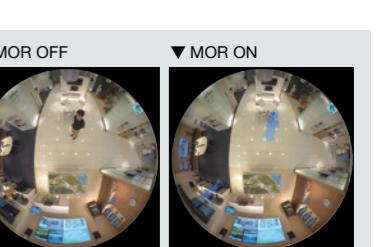

MOR (Moving Object Remover)

Type3 / Type5

MOR is a privacy-conscious function which removes people from the image and only send the background image.

Support for Various Installation Environments

Panasonic network cameras are available in a full lineup of products custom-tailored for a wide range of installation environments.

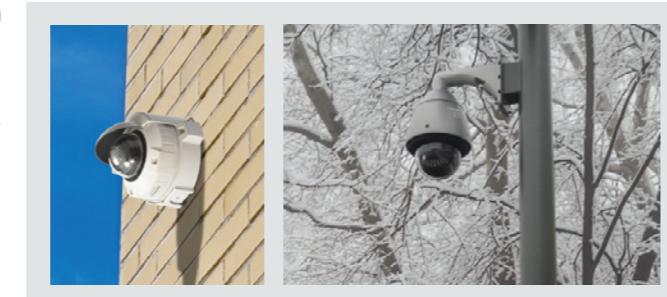

Their specialized design also helps to reduce the work required for installation.

• Select the Specialized Model for Your Installation Environment

Temperature protection for outdoor installations

Models can be selected to match your specific installation conditions and can be installed in environments with temperatures ranging from +60°C to -50°C.

*The supported temperature range varies depending on the specific model.

Dehumidification Device

The network camera outdoor models have a built-in dehumidifier device to lower the internal humidity for preventing cloudiness due to condensation.

This eliminates blurry video images caused by clouding of the camera dome cover when installed in locations with high humidity or extreme temperature changes over the course of the day.

Easy Installation

The Easy Kitting Package makes setting up the camera easy. Users do not even need to remove the camera from the box to setup the camera.

This packaging helps reduce the time and effort it requires to install multiple cameras.

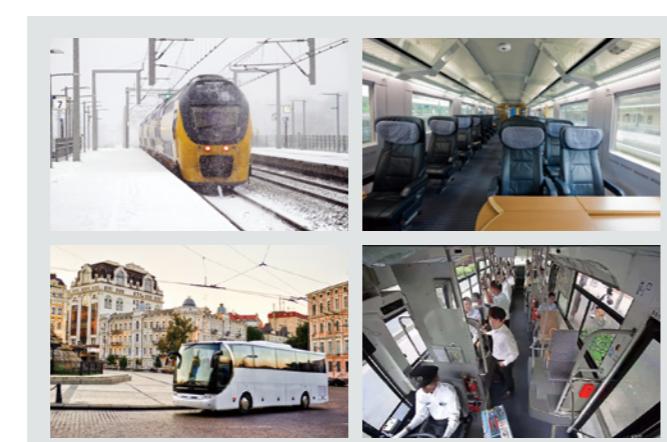

On outdoor models, the RJ45 Joint Connector removes the need of using waterproof tape and reduces the time it takes to install the camera.

Onboard Model

A lineup of network cameras is also available with anti-vibration and other specific features for installation in cars, buses, and other vehicles.

The WV-SBV131M, WV-SBV111M, WV-SFV130(M), WV-SFV110(M), WV-X4571L(M), WV-S4550L(M), WV-SW458MA, and WV-SFV481 are compliant with the EN50155 European railway standards.

Support for Various Installation Environments

Mount on the Outside of the Vehicle

The rugged mobile network camera WV-SBV131M, WV-SBV111M meets the United States Department of Defense Military Standards MIL-STD-810G to withstand even the harshest of environments.

Also meeting the highest International Protection Standards IP6K9K, the camera is dust tight and waterproof.

Meeting such standards allows the camera to be mounted on the outside of busses and trains, which are constantly shaking and rained on.

The lenses' hard coated surface allows the vehicle to be put through a carwash.

Capable of withstanding temperatures ranging from -40 °C and up to +60 °C (-40 °F and up to 140 °F) the camera is highly versatile.

Reduced Installation Time

The i-PRO Series cameras include a number of features for reducing the time required for installation. If you want to change the camera direction after installation, the camera direction can be changed in 90° steps without removing the base (EXTREME models).

The dome cover can also be easily removed to change the direction of the lens.

For Outdoor Box type cameras (EXTREME models), the stay can be bent to one of two levels to allow installation with a high degree of freedom.

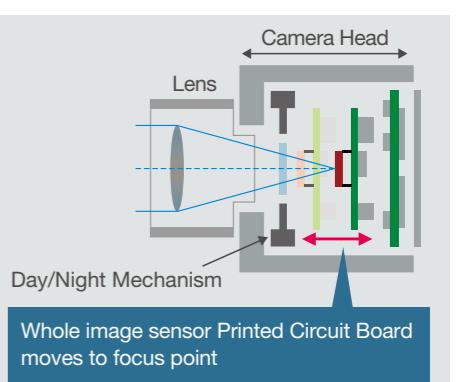

ABF (Auto back Focus)

The ABF feature automatically adjusts the image sensor position when changing from color to B/W mode, optimize the back focus required for clear, sharp images.

In addition, the one-push Auto Back Focus feature sharply reduces the time required to focus cameras during installation, allowing focus to be set using the optional system controller.

The ABF function can also automatically sense and adjust to slight focal length changes due to parts warping caused by temperature changes in the area where the camera is installed.

Special Screws for Added Security

Specially-shaped screws are used to secure the cover to prevent tampering with the camera or theft of the SD memory card.

Network Video Recorders

i-PRO EXTREME

TURBO-RAID Network Disk Recorder

WJ-NX400

(120 V AC: NTSC, 220-240 V AC: PAL)

Additional Camera kits : **WJ-NXE40, WJ-NXE40W**

- 64 ch. expandable to 128 ch. camera input. Support **H.265 / H.264** mixed recordings.
- **640 Mbps** total through put (including **384 Mbps** recording bandwidth)
- (9) integrated drive-bays **RAID 1 / 5 / 6**
- External storage expansion up to **324 TB**
- Redundant fail-over using 2nd recorder to enable mission-critical recording* *KMS registration is necessary for activation.
- NVR backup important data to NAS devices.* *KMS registration is necessary for activation.
- Symantec device certificates pre-installed *Secure Communication Kits are necessary.
- Built-in GUI and Dual HDMI (4K/FHD) outputs

Example of a Basic Connection System

i-PRO EXTREME

TURBO-RAID Network Disk Recorder

WJ-NX300

[WJ-NX300K (120 V AC): NTSC] [WJ-NX300K/G (220 - 240 V AC): PAL]

Additional Camera Kits : **WJ-NXE30, WJ-NXE30W**

Additional RAID Kits : **WJ-NXR30, WJ-NXR30W**

- 16 ch. expandable to 32 ch. camera input. Support **H.265 / H.264** mixed recordings.
- 512 Mbps total through put (including 256 Mbps recording bandwidth)
- (4) integrated drive-bays **RAID 1 / 5 / 6**
*Additional RAID Kit license is necessary to use the RAID feature.
- **TURBO-RAID** for quick RAID recovery without sacrificing recording bandwidth and performance
- Built-in GUI and Dual HDMI (4K / FHD) outputs

Optional Accessories

Hard Disk Extension Unit

WJ-HXE400

Power Source
120 V AC, 60 Hz (NTSC),
220 - 240 V AC, 50 Hz (PAL)

Power Consumption approx. 85 W

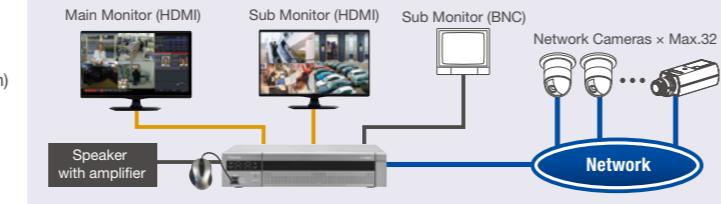

Dimensions 430 mm (W) x 132 mm (H) x 413 mm(D)
(From Rack Mount Bracket 400 mm)
(16-15/16" (W) x 5-3/16" (H) x 16-1/4" (D))
(From Rack Mount Bracket 15-3/4")
(excluding rubber feet and projections)

Weight 11 kg (24.3 lbs.) (When no HDD exist)
19.5 kg (43 lbs.) (When 9 HDDs are installed)

Rack Mount Bracket WV-Q202

Easy Operation and Setup without PC

i-PRO EXTREME

Network Disk Recorder

WJ-NX200

[WJ-NX200K (120 V AC): NTSC] [WJ-NX200K/G (220 - 240 V AC): PAL]

Additional Camera kits : **WJ-NXE20, WJ-NXE20W**

- Significant reduction of storage space usage through **H.265 and Smart Coding**.
- 9 ch. expandable to 16(WJ-NX200K) / 32(WJ-NX200K/G) ch. camera input. Supports **H.265 / H.264** mixed recordings.
- Quick setup by automatic camera detection and simple setup wizard without the use of PC
- **High-speed copy to USB storage**
- Built-in GUI and Dual HDMI (4K / FHD) outputs

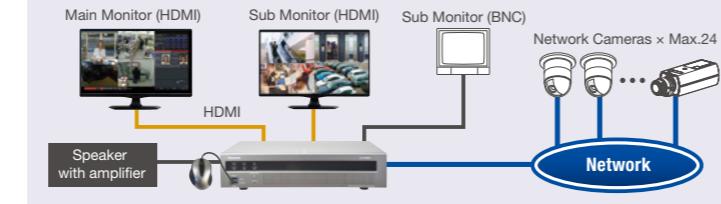

Optional Accessory

Rack Mount Bracket

WV-Q202

Easy Operation and Setup without PC

Secure Communication Kits **WJ-NXS01(W), WJ-NXS04(W), WJ-NXS16(W), WJ-NXS32(W)**

The Secure Communication Kits are license kits to use the security function of the network disk recorder.
Each Secure Communication Kit allows the following number of cameras to be registered.

WJ-NXS01, WJ-NXS01W	WJ-NXS04, WJ-NXS04W	WJ-NXS16, WJ-NXS16W	WJ-NXS32, WJ-NXS32W
1 camera	4 cameras	16 cameras	32 cameras

Network Products

Network Video Recorders

Limited quantity

Network Disk Recorder

WJ-ND400

(120 V AC: NTSC, 220-240 V AC: PAL)

- Up to 64 network cameras can be connected and recorded (Video and Audio)
- Various Recording Mode: Manual, Schedule including Event (Pre/Post), Emergency
- VMD search (works with i-PRO cameras)
- Up to 54 HDD slots with 9 HDD slots in the main unit and five WJ-HDE400 optional Extension Units each with 9 HDD slots
- RAID5 / 6, Embedded OS, Data encryption for reliability

Optional Accessory

Hard Disk Extension Unit

WJ-HDE400

Power Source
120 V AC, 60 Hz (NTSC)
220 - 240 V AC, 50 Hz (PAL)

Power Consumption approx. 130 W

Dimensions 430 mm (W) x 132 mm (H) x 400 mm (D)
(16-15/16" (W) x 5-3/16" (H) x 15-2/16" (D))
(excluding rubber feet and projections)

Weight 13.5 kg (29.8 lbs.) (When no HDD exist),
20 kg (44.15 lbs.) (When 9 HDDs are installed)

Network Disk Recorder

WJ-NV300

(120 V AC: NTSC, 220 V -240 V AC: PAL)

Additional Camera kit : **WJ-NVE30**

Optional Accessories

Hard Disk Extension Unit

WJ-HDE400

Limited quantity

Network Disk Recorder

WJ-NV200

(120 V AC: NTSC, 220 V -240 V AC: PAL)

- Up to 16 network cameras can be connected and recorded.
- Quick setup by automatic camera detection and simple setup wizard without the use of PC
- Simple mouse operation by new GUI without the use of PC
- HDD capacity is expandable up to 20 HDD slots (2 HDD slots in the main unit and 2 optional WJ-HDE400 Hard Disk Extension Units each with 9 HDD slots).

Network Products

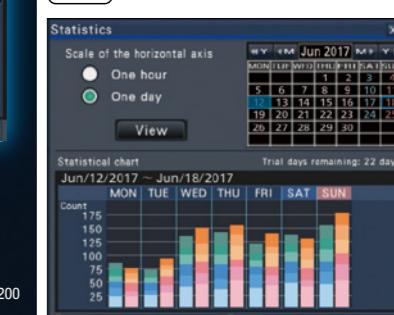

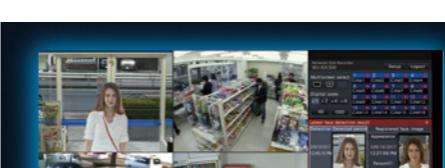

Additional Business Intelligence Kits

i-PRO EXTREME

Additional Business Intelligence Kit

WJ-NXF02, WJ-NXF02W

Additional Business Intelligence Kits WJ-NXF02, WJ-NXF02W are license kits intended to improve the usefulness of Network Disk Recorder WJ-NX300 / WJ-NX200.

*To use this product, it is necessary to register the license (Registration Key) for Additional Business Intelligence Kit into the WJ-NX300/WJ-NX200/WJ-NV300/WJ-NV200 in use.

- New statistical processing functions such as "People counting" and "Face matching / Age & Gender judgment"

- The number of detected human faces can be displayed on a statistical chart separated by age & gender for a single day or a specified time period.
- Age distribution groups are displayed by separate colors.

- The statistical data can be saved as a CSV file¹ on a USB² or SDHC/SD memory card³, or on a PC connected over a network.

¹: CSV file: A file that can be edited using a spreadsheet software such as Microsoft® Office Excel®

²: WJ-NXF02, WJ-NXF02W ³: WJ-NVF30, WJ-NVF20

Plug-in Software

Plug-in Software for i-VMD
WV-SAE200

WV-SAE200 is plug-in software for activating the i-VMD(Intelligent video motion detection) function and Face detection function. Intelligent Video Motion Detection(i-VMD) is possible to detect objects in the specified area by advanced video analysis technology.

Actions When an Alarm is Detected

Network Products

Management software WV-ASM300
Real-time monitoring of audio and video Playback of recorded audio and video (Network Disk Recorder required)

Network disk recorder WJ-NX300 / WJ-NV300
Real-time monitoring of audio and video Playback of recorded audio and video

Pick up clear sound of specified area in noisy or acoustically live environments.
10 m
Can be monitored the sound on specified area.

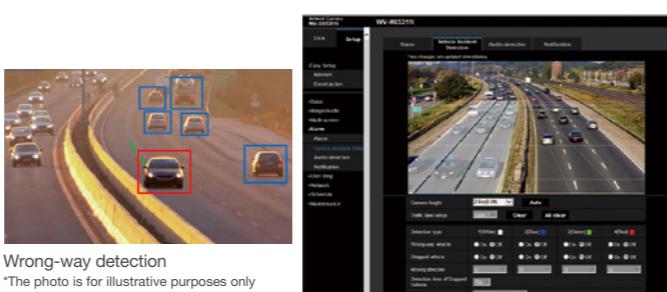

Network Products

Plug-in Software

Plug-in Software for Vehicle Incident Detection
WV-XAE100W
Camera detects vehicle incidents on the road with video analytics technology.

The camera detects incidents such as wrong-way-driving and stopped vehicles, and then notifies the Traffic Management System of such occurrences by alarm. This enables prompt recognition of incidents without the need for round-the-clock monitoring of multiple camera images.

* Compatible models: WV-X6531NS, WV-X6531N, WV-X6511N

Network Products

Extension Software
WV-SAE303W

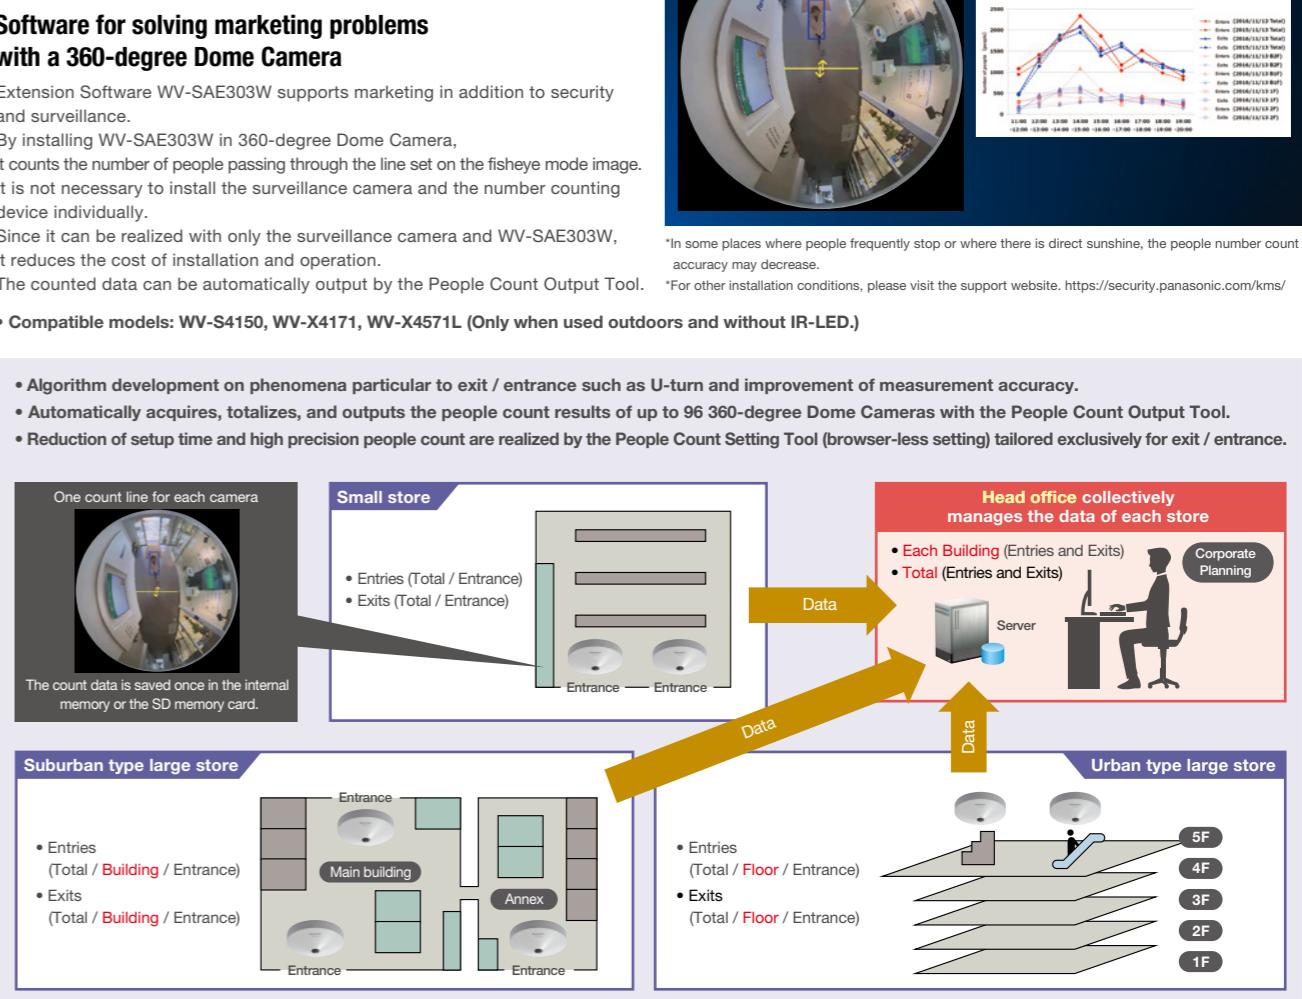

This product cannot be used at the same time as i-VMD extension software WV-SAE200W.

Software for solving marketing problems with a 360-degree Dome Camera

Extension Software WV-SAE303W supports marketing in addition to security and surveillance. By installing WV-SAE303W in 360-degree Dome Camera, it counts the number of people passing through the line set on the fisheye mode image. It is not necessary to install the surveillance camera and the number counting device individually. Since it can be realized with only the surveillance camera and WV-SAE303W, it reduces the cost of installation and operation. The counted data can be automatically output by the People Count Output Tool.

* Compatible models: WV-S4150, WV-X4171, WV-X4571L (Only when used outdoors and without IR-LED.)

Algorithm development on phenomena particular to exit / entrance such as U-turn and improvement of measurement accuracy.
Automatically acquires, totalizes, and outputs the people count results of up to 96 360-degree Dome Cameras with the People Count Output Tool.
Reduction of setup time and high precision people count are realized by the People Count Setting Tool (browser-less setting) tailored exclusively for exit / entrance.

Management Software

IP Matrix Server Software
WV-ASC970IP Matrix Client Software
WV-ASM970Extension Software
WV-ASE901* (Monitor the status of Fire Alarm System) / **ASE902 / ASE903 / ASE904 / ASE905**

Easy and smooth integration from analog to IP system

WV-ASC970

- Flexible system design: Analog, IP, and Hybrid analog/IP
- Up to 64 recorders, 1,024 monitors, and 2,048 cameras (in case with encoder) can be registered
- Camera/Sequence/Monitor selection, Camera control and Recorder control can be made with the optional system controller WV-CU950
- Supported Recorders: WJ-NX400 series, WJ-ND400 series, WJ-NV200 series, WJ-NV300 series, WJ-HD616/716 series
- Redundant function supported (Redundant function can consist of 2 WV-ASC970 servers as Main server and Standby server)

Extension Software WV-ASE901*

- Monitor the status of Fire Alarm System.
- Manually reset or acknowledge fire alarms and faults of Fire Alarm System.
- Search history of fire alarm, faults and interlocking of Fire Alarm System.

*WV-ASE901 is only sold in certain areas.

Please contact the sales company for details.

i-PRO Central Management Software

WV-ASM300

Extension Software

WV-ASE202 / ASE203 / ASE204 / ASE205 / ASE306

Optional Accessory

Ethernet System Controller
with 3D-Joystick & Jog/Shuttle
WV-CU950

Easy setting : New WV-ASM300 software enable a whole setting from camera configuration to recorder configuration.

- Up to 100 recorders, 64 encoders and 256 directly connected cameras can be registered. Up to 6,400 cameras registered in the recorders and 256 cameras registered in the encoders are automatically registered in the WV-ASM300 (the number of the cameras depends on the recorder and encoder).
- Encryption of SSL and data encryption support latest "AES-256bit key" strong encryption
- MP4 data direct download from WJ-NX400, WJ-NX200
- When used with WJ-NX400 series, VMD, thumbnail search can be operated.

WV-ASE202

- Expand the maximum numbers of screens to 64.
- Up to 4 live windows.
- Multi-monitor function using up to 6 PC monitors.
- To display the operation window, the map window and the 4 map windows simultaneously.

WV-ASE203

- Expand the maximum numbers of registered recorders, encoders and cameras to 100, 64 and 256 respectively.
- Up to 4 licenses for the WV-ASE203 can be added.

WV-ASE204

- Decoder registration: Up to 10 decoders

WV-ASM970

- Multi-Monitor option enables simultaneous use of Operation screen and Monitor screen (1 / 4 / 7 / 9 / 10 / 13 / 16 split) on a dedicated monitor. Two monitor operation is also available.
- Up to 30 ips/camera can be displayed in 16 split-screen in MPEG-4 2 Mbps mode (depending on the camera, camera setup and PC performance).
- Up to 30 ips/camera can be displayed in 16 split-screen in H.264 1.5 Mbps mode with VGA (depending on the camera, camera setup and PC performance).

Extension Software WV-ASE902

- Up to 4 live monitor
- Multi monitor function up to 5 PC monitors
- To display the operation window and 4 live windows simultaneously

Extension Software WV-ASE904

- Controlling Video Insight server

Extension Software WV-ASE903

- Visibility Enhancement Function

*Same as WV-ASE205 below.

Extension Software WV-ASE905

- The cropping function of 4K video.

Face Server

Facial Recognition Server Software
WV-ASF950

Additional Camera Kit

1ch : WV-ASFE901 / 4ch : WV-ASFE904

Registration Face Extension Kit

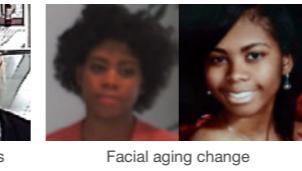

10,000 face : WV-ASFE951

Facial recognition server software using deep learning technology

High performance facial recognition

- High performance Deep Learning facial recognition function distinguishes face orientation, sunglasses, facial aging change

*There might be a change of specification.

	WV-ASF950
Range of angles*	Horizontal range : -45° to +45° Vertical range : -30° to +30°
Minimum size of the face image*	30 pixel (Eye Distance : 15 pixel)

Cost advantage

- Up to 20 cameras can be connected to one server. Reduce the system total cost such as server cost, network cost etc.

*The number of cameras that can be connected is determined by the number of people passing and the retention period of the face image.

Best shot (optimum image extraction) function equipped camera

Face detection,
Face image clipping,
Best shot judgment

Send only necessary images (best shot images)

Facial Recognition server Low load

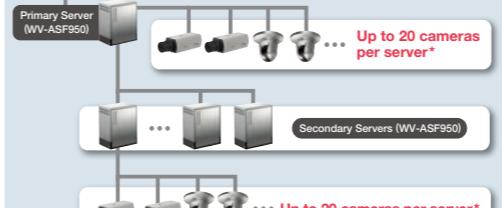

- Face matching, report alarm
- Age and gender evaluation

System scalability

- Up to 30,000 faces can be registered and WV-ASF950 can be used in large facilities.

Max 10 servers up to 2,000 cameras

*The WV-ASF950 includes license for 4 network cameras. To connect more than 5 cameras to the WV-ASF950, purchase WV-ASFE901 or WV-ASFE904 sold separately.

Face search

- Face images that camera detected are stored, and it can be searched later.
- By searching the face database, you can display the result of each cameras in chronological order and find movement locus of persons.
- Specify camera or date in detected face images and display the result in the list in similarity order.

Face Matching

- When it is matched with registered people, alarm of face matching is output in real-time, and display an alarm history in the list.
- Specified screen image can be played back on control monitor with double-clicking on an alarm history.

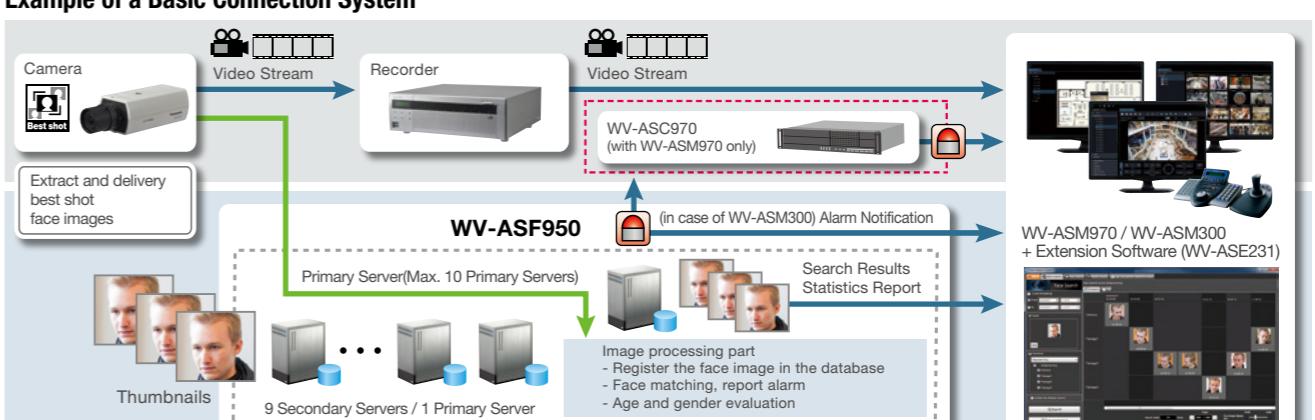

People counting, Age and Gender Statistics

- Count people of detected face and evaluate their age and gender
- Display the result on the screen with statistical graph
- The statistical data can be saved as a CSV file* for analytical use.

Example of a Basic Connection System

Extension software

WV-ASE231

for WV-ASM970 / WV-ASM300

- To use the WV-ASF950, WV-ASM970, WV-ASM300 with extension software WV-ASE231 is required.

- Extension Software for Facial Recognition Analytics Platform (WV-ASF950)
- Face Matching / Face Search / People counting results display on WV-ASM970 / WV-ASM300 screen
- i-VMD (Intelligent Video Motion Detection) tracking path display on WV-ASM970 / WV-ASM300 screen

Panasonic Security Viewer

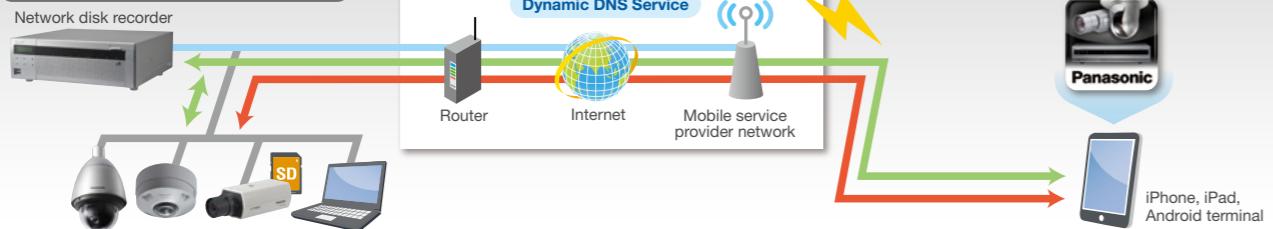

Introduction of the application

Panasonic Security Viewer is an application that can view the images from i-PRO Series Network Cameras, Network Disk Recorder. By connecting a terminal to a 3G/4G or wireless LAN (Wi-Fi), it is possible to view live images from cameras registered on the recorder and recorded images stored on recorders.

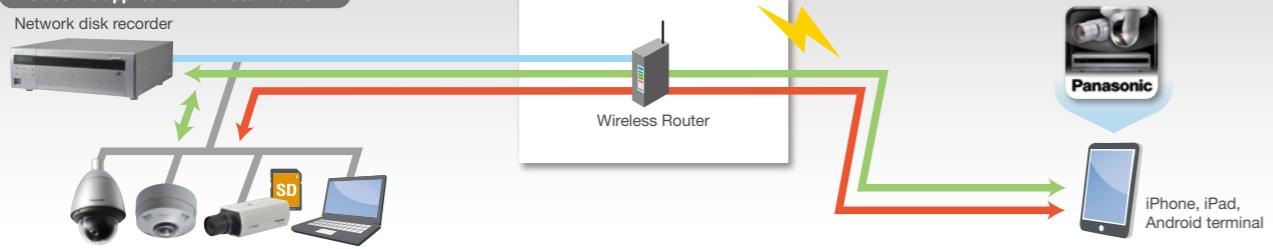

Preface

To use the **Panasonic Security Viewer** via the Internet, it is recommended to register in the Dynamic DNS (DDNS) service.

To use the application via the Internet

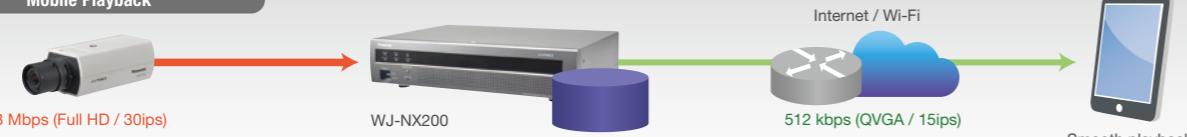

To use the application in a local network

A PC is required to register a Dynamic DNS Service and configure the settings of the router.

Mobile Playback

WJ-NX400 / WJ-NX300 / WJ-NX200 / WJ-NV300 can transcode image size/bit rate to fit the customers environment, and stream it. This mode can be used by WJ-NX400 / WJ-NX300 / WJ-NX200 / WJ-NV300 only.

- Download the Panasonic Security Viewer application on the Google play™ store, Apple App Store.

Features of the application

Network disk recorder

- Live image: Live images from the network cameras connected to the recorder
- Playing back recorded images: To play back the images stored on the recorder
- Mobile Playback feature (WJ-NX400 / WJ-NX300 / WJ-NX200 / WJ-NV300)
- Time & date search: To search the images to play back based on the time & date

Network camera

- Network camera control* (Resolution switchover, focus, panning / tilting, zoom, preset position switchover)
- Playing back recorded image in the SD memory card*

*Depends on the network camera functions.

Android™

Outline of the application

OS	Android™ OS 4.0 ~ 6.0
How to get the application	Download from the Google play™ store.
Operation check terminals	Galaxy S2, Galaxy S3, Galaxy S4, Xperia Z1, Xpeira Z5, Nexus5, Nexus5X, Nexus7, Nexus9, ASUS ZenPad

- Download the application from here.

Android™ <https://security.panasonic.com/android/>

iPhone / iPad

Outline of the application

OS	iOS 8 or later
How to get the application	Download from the App Store.
Operation check terminals	iPhone5, iPhone5S, iPhone6, iPhone6 Plus, iPhone6s, iPhone7, iPhone X, iPad Retina, iPad Air, iPad mini, iPad Pro

- Download the application from here.

iPhone / iPad <https://security.panasonic.com/ios/>

Easily migrate to an advanced IP system while still using the existing assets of your analog system

Effective utilization of analog cameras

Encoder

- Analog cameras can be connected to the IP network simply by connecting them to the encoder.
- A maximum of four analog cameras can be connected to the WV-GXE500, and one analog camera can be connected to the WV-GXE100.
- Video captured by analog cameras can be saved to a recorder installed on the IP network in the same way as network cameras.

Basic System Connection Example

4 CH H.264 Video Encoder

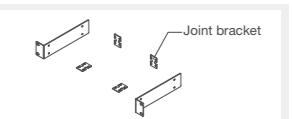

WJ-GXE500

(12 V DC or PoE)

Optional Accessory

EIA 48.26 cm (19 inch) Rack Mount Bracket WV-Q204/2S (for mounting three WJ-GXE500)

1 CH H.264 Video Encoder

WJ-GXE100

(12 V DC or PoE)

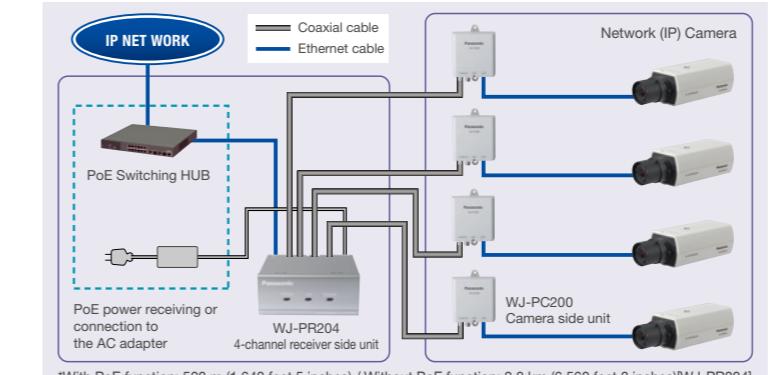

Effective utilization of cabling

Coaxial-LAN Converter

- The coaxial cables of existing analog cameras can be used for expanding the reach of the IP network.

Basic System Connection Example

*With PoE function: 500 m (1,640 feet 5 inches) / Without PoE function: 2.0 km (6,560 feet 8 inches)[WJ-PR204]

Coaxial LAN cables can be used up to distances of 2.0 km.[WJ-PR204] Power can also be supplied to PoE cameras for distances of up to 500 m, PoE+ cameras for distances of up to 300 m.

*Distance will vary depending on the power supply environment. Please refer to the spec sheet for details.

Coaxial-LAN Converter with PoE function

4-channel receiver side unit

WJ-PR204

1-channel receiver side unit

WJ-PR201

(Indoor use only)

Optional Accessory

Rack Mount Connecting Fitting BY-HCA10A (for mounting three or four Receiver side unit)

- For U.S. and Canada : BY-HCA10A

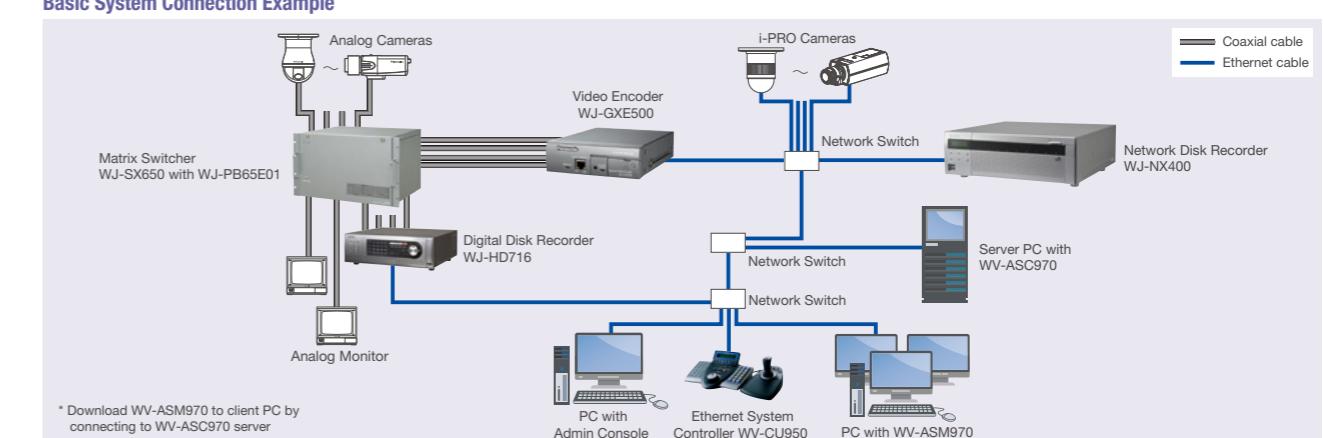

- For Europe and other countries : BY-HCA10CE

IP and analog integrated hybrid system

- The WV-ASC970/WV-ASM970 can be used to integrate management and operation of centralized systems that use both analog and IP system components.

Basic System Connection Example

* Download WV-ASM970 to client PC by connecting to WV-ASC970 server

This is the **Panasonic** difference!

With our proven track record of success in both analog and IP cameras, Panasonic can provide a one-stop equipment and system solution for successful migration from analog to IP.
